

MECHANICAL ANCHORS

Heavy-duty general purpose anchors for any base material:

- Concrete
- Concrete block (grouted and hollow)
- Brick
- Drywall

High-performance anchors designed and tested for use in cracked or uncracked concrete

- Optimum performance under static tension and shear loading
- Proven results under Seismic and Wind loading
- Ideal for demanding structural applications

Blue Banger Hanger® threaded rod hanger

- Installs before the concrete pour
- Provides high tension loads for overhead attachments
- Each hanger capable of accepting multiple diameters of threaded rod
