

'Sleeve Protected' Mechanically Galvanized Fasteners For Powder Actuated Tools

Due to the corrosive effects of the chemicals in some pressure treated lumber, you may need a powder actuated fastener with a mechanically galvanized coating for protection – and this MG coating needs to stay on during installation. Simpson Strong-Tie has mechanically galvanized pins with washers that do just that. They use a low friction plastic sleeve that allows the pin to pass through the washer without removing the MG coating. That's coating protection you can rely on.

PDPWLMG
(Patent Pending)

Simpson PDPWLMG fastener

Nylon sleeve protects the fastener shaft.

Competitor Fastener

Galvanization flakes off during installation resulting in rapid corrosion and weakening of the fastener.

.300" Headed Fasteners with 1" Metal Washers – Mechanically Galvanized with Protective Sleeve

Mechanical Galvanizing meets ASTM B695, Class 65, Type1.
*PDPWLS has a square washer
